Planetrehab 2.382 Release Note
September 24th, 2017
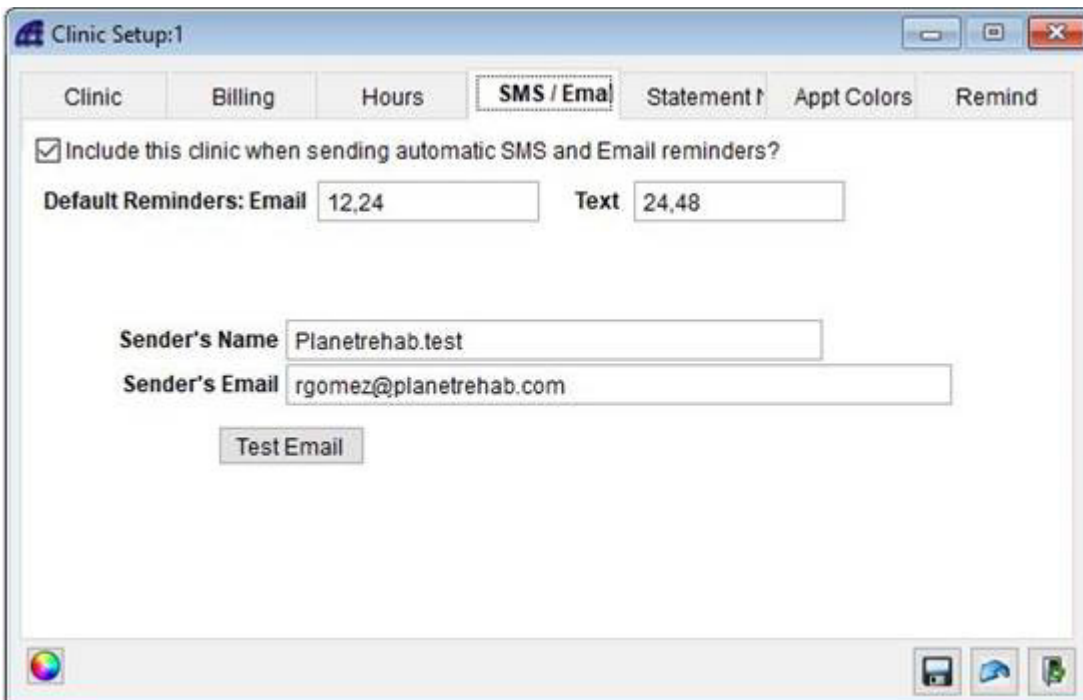

Along with our regular maintenance update, the latest version of Planetrehab has these notable new features:

Invoice Message—In View>Clinic Setup>Statement Tab>Inco Invoice Note field. Any text entered in the Inco Invoice Note field will be added to the invoice when using the Patient Insurance Invoices by date range report. This works like the Statement Note. We can also make this insurance company specific.

Default Reminders—Now you can enter the number of hours in the Email and/or the Text Reminder field that you want to automatically insert into the Email and Text Frequency Fields. For example, if you want to send out an email reminder to a patient one and two days before their appointment, you would enter 24, 48 in the Email Frequency field in the Patient Entry screen. If you want to populate the Email Frequency field with 24 and 48 automatically, simply enter 24, 48 in the Email Default dialogue field.
